OXFORD UNIVERSITY PRESS

Oxford University Press is a department of the University of Oxford. It furthers the University's objective of excellence in research, scholarship, and education by publishing worldwide.

A Dictionary of Business and Management

Sixth Edition

This wide-ranging and authoritative dictionary contains over 7,100 entries covering all areas of business and management, including marketing, organizational behaviour, business strategy, law, and taxation. In its sixth edition, it features the very latest developments, such as those relating to information technology (including mobile technology), and the financial crisis and the subsequent sovereign debt crisis. Entries have been updated to refer to recent events and news in the field, for example the LIBOR scandal.

Over 100 new entries have been added including bitcoin, Cog's Ladder, mobile commerce, Six Sigma, social media, theory of institutional deficiencies, and zero-hours contract. Furthermore, there is expanded coverage of areas such as financial regulation and corporate social responsibility, with a number of new entries offering insight into these topics, including aw-shucks defence and Financial Conduct Authority.

The new edition of this established bestselling dictionary elucidates modern financial and management jargon, defining entries in a clear, concise, and accessible manner. With recommended web links for many entries, accessible and kept up to date via the Dictionary of Business and Management companion website, this edition is more informative than ever. This A—Z reference work is essential for business students, teachers and professionals, and useful for anyone needing a guide to business terminology.

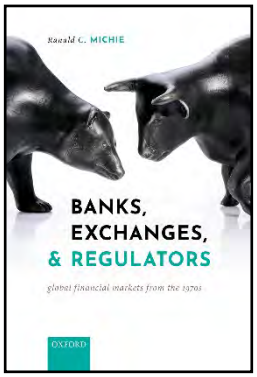

Jonathan Law is an editor at Market House Books Ltd.

Banks, Exchanges, and Regulators

Global Financial Markets from the 1970s

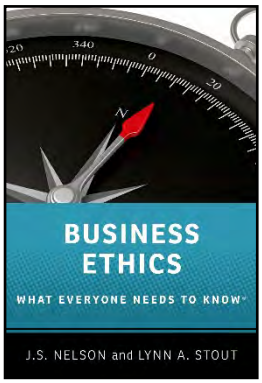

In this book, Ranald C. Michie provides an authoritative and unrivalled account of this upheaval based on a careful and exhaustive reading of the Financial Times over the last four decades, using it to provide a source of material unmatched by any other in terms of depth and coverage. By studying what happened and why in real time, it is possible to explain the decisions taken that shaped the course of the transformation and its repercussions.

Ranald C. Michie is one of the world's leading financial historians. He has taught at both Durham and Newcastle Universities and given papers to numerous academic gatherings around the world, including in Europe, North America, and Japan.

Business Ethics

Business Ethics: What Everyone Needs to Know ® explains what those lines are, how not to cross them, and what to do when they are crossed. Written for both businesspeople facing real-life dilemmas and students studying ethical questions, this succinct book uniquely surveys materials from moral philosophy, behavioral science, and corporate law, and shares practical advice.

J.S. Nelson is a professor of law and an expert legal advisor. She holds the first tenure-track appointment in a U.S. law school specifically to teach business ethics and develop law-school curricula around the subject.

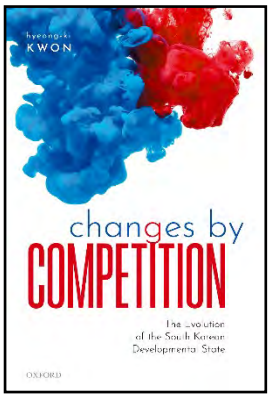

Lynn A. Stout was an American corporate law scholar and a Distinguished Professor of Corporate & Business Law at Cornell Law School.

Changes by Competition

The Evolution of the South Korean Developmental State

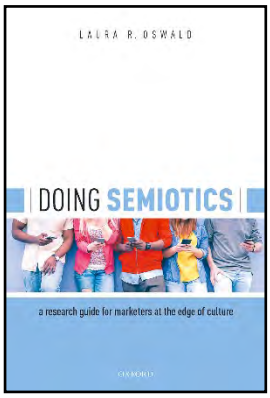

This book explores the evolution of state-led developmentalism in Korea and examines prevalent theories including neoliberalism, the developmental state, and institutionalism and includes research based on many interviews and private firms' responses to state policies. The book reveals evidence of competition within the Korean state and emphasizes the fragmentation and competition among elites within and outside the state

Hyeong-ki Kwon is Professor of Political Science at Seoul National University. His research interests are changes in national economies in the course of globalization, including the US, Germany, Japan, Ireland, and Korea.

Doing Semiotics

A Research Guide for Marketers at the Edge of Culture

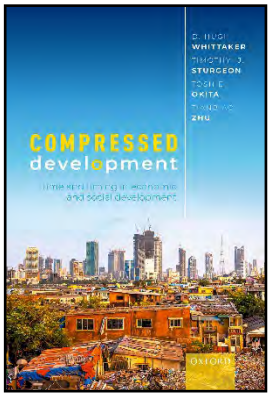

Doing Semiotics shows readers how to leverage these codes to solve business problems, foster innovation, and create meaningful experiences for consumers. In addition to the key principles and methods of applied semiotics, it introduces the basics of branding, strategic decision-making, and cross-cultural marketing management.

Laura Oswald is founder and president of Marketing Semiotics, a brand strategy and research boutique in Chicago, Illinois.

9780198862116 | Paperback | 2020 | ₹1295

Compressed Development

Time and Timing in Economic and Social Development

This book proposes a new way to approach comparative international development by focusing on time and timing in economic and social development. The UK industrialized over two centuries, and then started to de-industrialize in the late 1960s. Today, the most rapid developers experience aspects of industrialization and de-industrialization simultaneously. It is no longer clear that industrialization offers the path of growth it once did; industrialization has become 'thin.' Demographic and social challenges that earlier developers faced sequentially now come at the same time. Rapid growers experience compression most acutely, but the spatial and temporal fusing of past and present is widespread, affecting high-, middle-, and lower-income countries alike.

D. Hugh Whittaker is Professor in the Economy and Business of Japan and Fellow of St Antony's College, University of Oxford.

Timothy Sturgeon is Senior Researcher at the Industrial Performance Center, MIT.

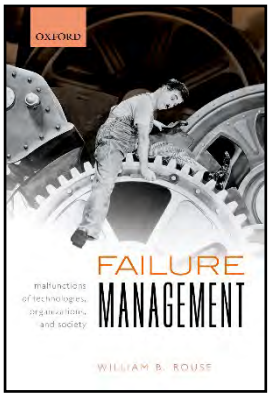

Toshie Okita is Research and Teaching Associate at the Nissan Institute of Japanese Studies, University of Oxford.

Tianbiao Zhu is Professor, Deputy Chair for the Department of Sociology, and Executive Director for the Institute for Advanced Study in Humanities and Social Sciences at Zhejiang University.

9780198744948 | Hardback | 2020 | ₹4295

Failure Management

Malfunctions of Technologies, Organizations, and Society

Failures are a common phenomena in civilization. Things fail and society responds, often very slowly, sometimes inappropriately. What kinds of things go wrong? Why do they go wrong? How do people and organizations react to failures, and what are the best ways to react?

William B. Rouse takes an analytic approach to these questions and addresses eighteen well-known cases of high-consequence failures.

William B. Rouse is Research Professor in the McCourt School of Public Policy at Georgetown University.

How Brands Innovate

The Principles of Cultural Strategy

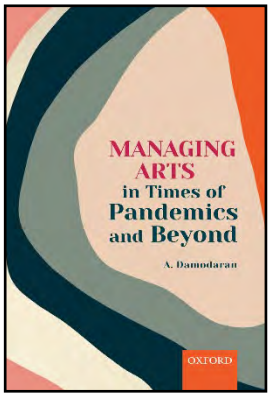

In How Brands Innovate, Douglas Holt provides an entirely different way to understand how innovation works from the conventional ideas that dominate in business. He argues that market transformations are pushed forward by culture and society rather than new technology or new products. Holt—one of the world's leading thinkers and consultants on cultural approaches to branding, business strategy, and innovation—draws on his decades-long experience to show how companies can build innovative new businesses without the advantage of new technology or revitalize businesses that have lost their leading position.

Douglas Holt was Professor of Marketing at both the Harvard Business School and the University of Oxford. He is now President of the Cultural Strategy Group, a consulting firm he founded that provides brand strategy and innovation solutions using the cultural strategy framework.

Managing Arts in Times of Pandemics and Beyond

This book seeks to approach arts organizations in India and abroad from a management perspective, against the backdrop of COVID-19 and in the light of the advances made by digital technologies such as blockchains. It follows a case-based approach by taking a closer look at eight arts organizations drawn from the USA, Canada, Japan, India, and Russia.

A . Damodaran is Distinguished Professor at the Indian Council for Research on International Economic Relations (ICRIER), New Delhi.

9780192856449 | Hardback | 2022 | ₹1695

Open Innovation Results

Going Beyond the Hype and Getting Down to Business

The book begins with an exponential paradox; new technologies are emerging at an accelerating rate, yet we continue to see stagnant wages and lagging production. These realities are hard to reconcile with the promise of exponential technologies. A closer look suggests that exponential advocates are paying too little attention to the broad dissemination and absorption of a new technology before it delivers real profit and social benefit.

Henry Chesbrough is Adjunct Professor and Faculty Director of the Garwood Center for Corporate Innovation at UC Berkeley's Haas School of Business.

9780198841906 | Hardback | 2020 | ₹1495

An essential reading and must have for all graduate and post-graduate students of management, teachers, industry executives, and practitioners.

INDIA BUSINESS CASE STUDIES *(VOLUME 1-8)*

VOLUME I:

Authored by Sandeep, Pachpande, Asha Pachpande and J. A. Kulkarni, this volume has twenty cases from different fields like marketing, strategy, finance etc. Some of the prominent case studies involved *Managing Business with Respect: ITC, Building an Ethical and Smart Organization, Can SpiceJet be Resurrected?, Tata Motors: The Indian Auto Giant, Hyundai and Kia: The Journey of the Twins, Ranbaxy: The Indian Pharma Giant, Transfer Pricing in Cross-Border Taxation* etc.

9780192869371 | PB | ₹ 895/-

VOLUME II:

This volume captures some important cases related to banking like *ING Vysya Bank Vs Kotak Mahindra Bank, The Ghost of NPAs, Information Technology & Banking Industry.* It also presents cases from other business fields and some of these cases are *Starbucks: The 'Coffee House' Expert, Great Thought: Difficult for Business, Microsoft's Acquisition of Nokia, Coca-Cola: Taste the Controversy, The Price of Owning a Big Cat, Power Play and Ethics, and The Culture Vs Strategy.*

9780192869388 | PB | ₹ 895/-

VOLUME III:

Creating A Seamless Organization, Tata Group's Succession Saga, Tactics in Talent Management, Rich Owners and Their Poor Companies, Cafe Coffee Day: Way to Its Doomsday?, Never Flip Our Cart: We Are Flipkart, Lenovo India, Voltas AC Puts LG on Heat are some of the cases this volume presents to its readers. This one is authored by Lalit Kanore and Priti Mastakar.

9780192869395 | PB | ₹ 895/-

VOLUME IV:

This volume has some of the important cases related to corporate strategy like *Future of the 'Future Group', ITC at Crossroads, The BSNL Saga, What Really Went Wrong With Snapdeal?, Collapse of an Empire* etc. It also captures cases from other fields of business and cases such as *Maruti's Sanjeevani, Motivating Through Uncertainty, Wrong Signals for FDI Climate, A Good Strategy for Growth, The Candy Lounge, One Nation One Tax* etc.

9780192869401 | PB | ₹ 895/-

VOLUME V:

This volume has multidisciplinary Indian case studies from different areas of management like finance, human resource management, marketing, and strategic operations management. Some important ones are *Sony Pictures Network, The Nerves of Steel: Tackling Hard Core Issues, AI and the Ethical Dilemma, The Monster of Non-Productive Assets, An Audacious Acquisition, The Survival Instinct, Zomato's Tryst With Food, The Midnight Sun, Leveraging China, The Hindustan Bank Ltd, Indian Telecom Industry.*

9780192869418 | PB | ₹ 895/-

VOLUME VI:

This volume has twenty Indian cases related to different aspects of business management. From cases of the big companies like *The Patanjali Effect, Vedanta Resources and Cairns India Merger, Kelloggs in India, CEAT as We See It, Maruti's Lanka* to the cases which present great learning experiences such as *When The Leader Trips, Making an Elephant Dance, Impact of Demonetization and GST, Washing Linens to Cementing Structures, Who Can Beat the Goliath?*, this volume has case studies from across the business spectrum.

9780192869425 | PB | ₹ 895/-

VOLUME VII:

This has cases that give inside views of the organizations and how matters should be tackled. The prominent cases that this volume includes are *Employee Unrest and the Role of Labour Unions, Entrepreneurial Spirit and Ethics, The Generation and Technology Gap, Building an Ethical and Smart Organization, Counter-Cyclical Investment Strategy, Delayed Wisdom, Merger of ING Vysya With Kotak Mahindra Bank, Nokia Manufacturing Unit Knocked Out of India, The Prestigious Growth, Domino's India Supply Chain Management* etc.

9780192869432 | PB | ₹ 895/-

Personnel Management in India and Worldwide

The Past, Present, and Future

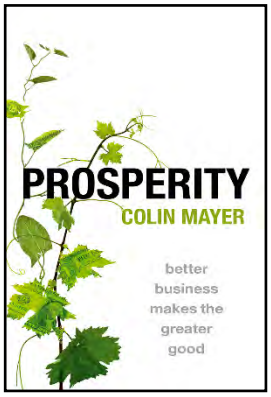

Personnel management is a business function, and business is a value-adding activity. A business, be it agriculture, manufacturing, mining, trading, or any other activity, is a process of conversion for the purpose of satisfying human needs and thereby adding value. Such conversion takes various forms. It may be in terms of quantity, quality, time, or space. All such conversions are done primarily through human effort. Therefore, the need for personnel management arose since the time business activities required organized application of human effort.

Rana Som, Former Chairman & Managing Director, National Mineral Development Corporation (NMDC), Government of India

9780192883773 | Hardback | 2023 | ₹1495

Prosperity

Better Business Makes the Greater Good

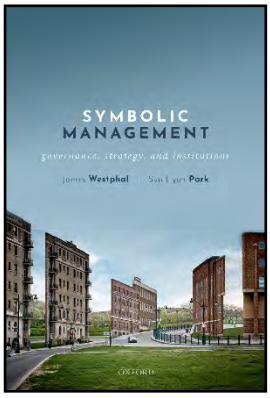

In this urgent call for reform, Prosperity challenges the fundamentals of business thinking. It sets out a comprehensive new agenda for establishing the corporation as a unique and powerful force for promoting economic and social wellbeing in its fullest sense – for customers and communities, today and in the future.

Colin Mayer is the Peter Moores Professor of Management Studies at the Saïd Business School, University of Oxford.

9780198866824 | Paperback | 2021 | ₹795

Symbolic Management

Governance, Strategy, and Institutions

In this book, James Westphal and Sun Hyun Park develop symbolic management into a major theoretical perspective on governance. Not only does symbolic management provide a compelling behavioural alternative to economic perspectives such as agency theory, but it subsumes economic theory. Agency theory is reconceived as a historically contingent institutional logic that became taken for granted among corporate stakeholders for a period of time and eventually replaced by a new logic of governance

James Westphal is the Harvey C. Fruehauf Professor of Business Administration at the Ross School of Business, University of Michigan.

Sun Hyun Park is Associate Professor of Strategy and International Management at College of Business, Seoul National University.

9780198792055 | Hardback | 2020 | ₹1850

Taming the Corporation

How to Regulate for Success

Taming the Corporation offers an alternative, positive, vision of regulation. It stresses the role of good regulation in allowing businesses to flourish, serve markets effectively, and respect broader interests. This perspective paves the way for more productive regulatory designs.

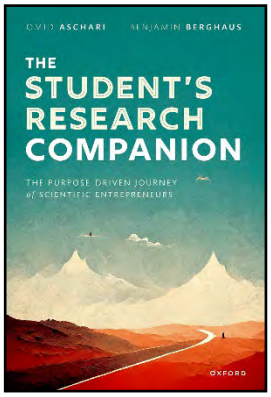

Robert Baldwin is Professor of Law Emeritus at the London School of Economics and Political Science and Director of LSE's Executive Education Course on Regulation.

Martin Cave is an economist specialising in competition law and the regulation of network industries, including communications, energy, and transport.

9780198836186 | Hardback | 2021 | ₹950

The Student's Research Companion

The Purpose-driven Journey of Scientific Entrepreneurs

Doing research means to bravely battle several challenges at once: not only do you try to come to grasps with your topic, conduct a useful project, and write it all up. You also serve as crucial motivator and hardest critic. You are expected to challenge yourself enough to grow, but not enough to lose your wits. And those are only two of the countless difficult balances to keep. No wonder that especially junior researchers feel exhausting stress, encounter intellectual and emotional cramps, and sometimes seemingly turn into thoroughly drained ghosts at the end of their research journey.

If you are wary of your upcoming final academic project since you have seen how others have struggled, this book is for you. It draws together fifty useful mindsets throughout the thesis process that can help you keep your nerves together, your mind sharp, and your productivity up.

The (junior) research experience needs to improve. This book will help find ways to optimize this experience. It follows the notion to consider junior researchers first as human beings, second as citizens, and third as researchers. Researchers are not algorithms that pick and apply methodology to problems - researchers are people who seek opportunities to help solve societies' problems by growing into the ability to reliably answer questions. If you agree, then this book is for you.

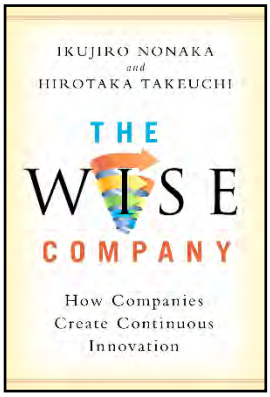

Professor Omid Aschari is an Associate Professor of Strategic Management and founding Managing Director of the globally respected flagship Master in Strategy and International Management (SIM-HSG) at the University of St. Gallen since its inception in 2003.

Dr. Benjamin Berghaus (HSG) is a scientific entrepreneur at the intersection of research, education, and practice in his field. Since 2018, Benjamin has established himself to work a broad portfolio of self- and co-initiated projects geared towards fostering young people at the transition from the academic to the professional phase of their lives.

9780192855312 | Hardback | 2023 | ₹1795

The Wise Company

How Companies Create Continuous Innovation

High-velocity change is the fundamental challenge facing companies today. Few companies, however, are prepared to continuously innovate — because they focus on the short-term and do not emphasize the wisdom needed to make sure that their interests are aligned with those of society.

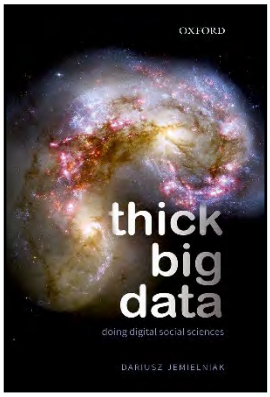

Ikujiro Nonaka is Professor Emeritus at the Graduate School of International Corporate Strategy, Hitotsubashi University, Tokyo.

Hirotaka Takeuchi is Professor of Management Practice at Harvard Business School.

9780190497002 | Hardback | 2020 | ₹1995

Thick Big Data

Doing Digital Social Sciences

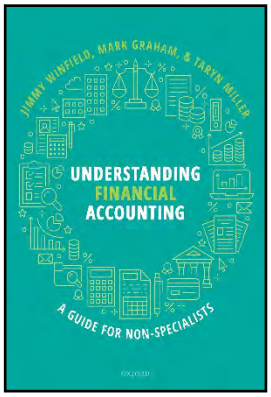

This book presents the available arsenal of new methods and tools for studying society both quantitatively and qualitatively, opening ground for the social sciences to take the lead in analysing digital behaviour. It shows that Big Data can and should be supplemented and interpreted through thick data as well as cultural analysis.

Dariusz Jemielniak is Full Professor of Management at Kozminski University in Poland, where he heads the MINDS (Management in Networked and Digital Societies) department.

9780198839712 | Paperback | 2020 | ₹1345

Understanding Financial Accounting

A Guide for Non-specialists

Do your students struggle to engage with financial accounting topics? Look no further than Understanding Financial Accounting to help them actively engage with the content, understand the key concepts, and advance their analysis skills.

Writing specifically for those with no background in accounting, the authors focus on how to extract the information that will contribute to business decision-making. Their conversational and captivating style makes even technical and complex principles unambiguous and immediately accessible.

James "Jimmy" Winfield is an Associate Professor at the University of Cape Town (UCT).

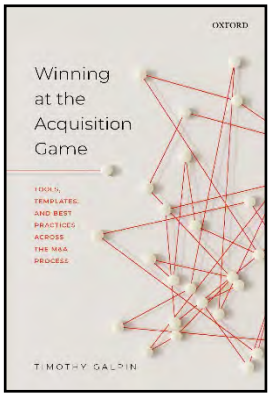

Mark Graham is a chartered accountant and an Associate Professor at UCT.

Taryn Miller is a chartered accountant and Senior Lecturer in the College of Accounting at UCT.

9780198847274 | Paperback | 2021 | ₹1675

Winning at the Acquisition Game

Tools, Templates, and Best Practices Across the M&A Process

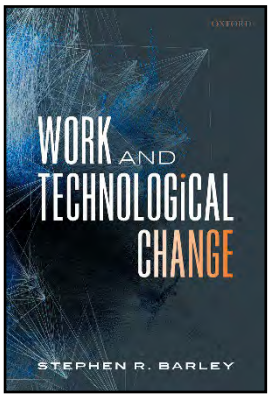

Winning at the Acquisition Game presents the best materials, insights, tools, and templates which comprise the comprehensive, cross-disciplinary Mergers and Acquisitions course taught in the MBA and Executive MBA programs at the Saïd Business School, University of Oxford.

Tim Galpin is a Senior Lecturer of Strategy and Innovation at Saïd Business School, University of Oxford, and a consultant to boards and senior management.

9780198858560 | Hardback | 2020 | ₹1995

Work and Technological Change

Stephen R. Barley reflects on over three decades of research to explore both the history of technological change and the approaches used to investigate how technologies are shaping our work and organizations. He begins by placing current developments in artificial intelligence into the historical context of previous technological revolutions, drawing on William Faunce's argument that the history of technology is one of progressive automation of the four components of any production system: energy, transformation, transfer, and control technologies.

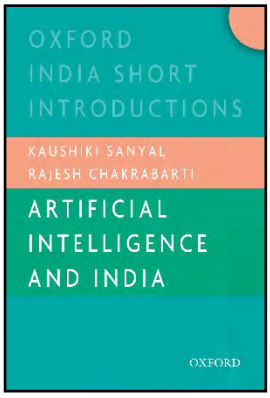

Stephen R. Barley is the Christian A. Felipe Professor of Technology Management in the College of Engineering at the University of California Santa Barbara.

Clarendon Lectures in Management Studies

9780198795209 | Hardback | 2021 | ₹700

ECONOMIC DEVELOPMENT AND GROWTH

Artificial Intelligence and India (OISI)

What is Artificial Intelligence (AI)? How did it evolve over the years and what is it going to look like in the future? What are the opportunities and risks associated with AI? Where does India stand among the global AI ecosystems?

This book answers these questions and gives a bird's eye view of the field of AI, with a special focus on India. In clear, jargon-free language, it explains what is and, more importantly, what is not AI.

Kaushiki Sanyal is the co-founder and CEO of Sunay Policy Advisory Pvt. Ltd, a public policy consulting, training, and research start-up.

Developmentalism

The Normative and Transformative within Capitalism

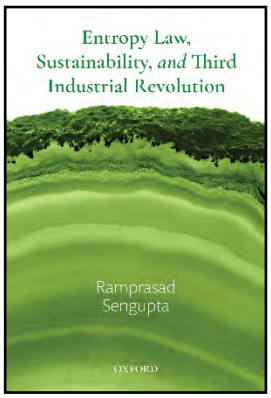

Developmentalism: The Normative and Transformative within Capitalism uses a historical comparative approach to understand development as a transformation which involves a deep and integrated political economy of change — a shift from a state of 'capital-ascendance' to 'capital dominance'. It is only through a transformation towards capital dominance that mass poverty reduction and the construction of a commonwealth are possible.

Graham Harrison is Associate Professor of Political Economy at the School of Government and International Affairs, Durham University.

Critical Frontiers of Theory, Research, and Policy in International Development Studies

9780198785798 | Hardback | 2020 | ₹4175

Entropy Law, Sustainability, and Third Industrial Revolution

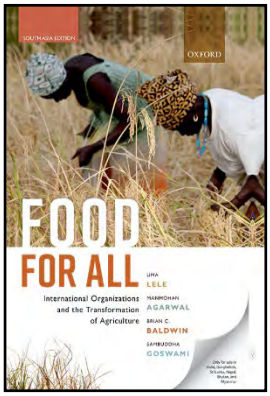

This book examines the key issues of sustainability—social, economic, and environmental. It discusses the social dimension of sustainability, showing how it is impacted by issues of economic inequality, poverty, and other socio-economic and infrastructural factors in the Indian context. It also highlights how Indian households suffer from clean energy poverty and points to the inequality in distribution of different fuels and of fuel cost among households.

Ramprasad Sengupta is Emeritus Professor of Economics at the Centre for Economic Studies and Planning at the School of Social Sciences, Jawaharlal Nehru University (JNU), New Delhi.

9780190121143 | Hardback | 2020 | ₹1295

Food for All

International Organizations and the Transformation of Agriculture

How have global institutions, established during the post-World War Two period, helped developing countries to deal with the past economic fallout of food, fuel, and financial crises? Food for All explores how developments since these organizations were established have led to changes in the provision of international financial and technical assistance in support of the global food and agriculture system and how developing countries' own efforts have helped transform them.

Uma Lele is a development economist with decades of experience in research, operations, policy analysis, and evaluation in the World Bank, universities, and international organizations.

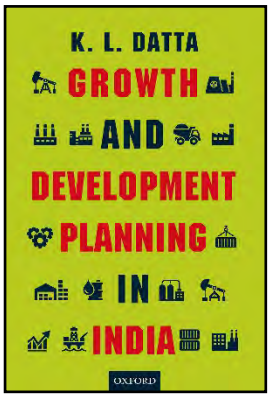

Manmohan Agarwal is Adjunct Senior Fellow at Research and Information Systems for Developing Countries, New Delhi.

Brian C. Baldwin is a geographer and agricultural economist.

Sambuddha Goswami is a researcher whose areas of study include data assembly.

9780192869258 | Hardback | 2022 | ₹1896

Growth and Development Planning in India

The central theme of the book is to analyse the role that planning played in maximizing the rate of economic growth and in improving the living standards of the people. Considering India's rapidly changing socio-economic environment, many of the issues around growth and development are contentious.

K. L. Datta is a retired Indian Economic Service officer. He spent 17 years of his career in the Planning Commission.

India Development Report 2022

The India Development Report (IDR) 2022 provides an independent assessment of the Indian economy including contemporary problems, issues, and policies. In addition to the general topics, the IDR 2022 contains a special section on employment and skills. The papers in this report deal with issues such as unemployment challenge, declining labour share, technology, and future of jobs and women at work. Other papers deal with a wide range of issues including impact of COVID-19 on the economy, macro-economic issues, banks and prevention of corruption, borrowing by Indian firms, agriculture, nutrition, education, health, and climate change. This report presents detailed and holistic view of the Indian Economy. Apart from other topics, it also focuses on the unprecedented situation of COVID-19 which had brought our way of life to an almost complete stop.

S. Mahendra Dev is former Director and Vice Chancellor, Indira Gandhi Institute of Development Research (IGIDR), Mumbai.

Indian Development

Selected Regional Perspectives

This volume of essays reflects an attempt to draw lessons from the disparate experiences within India, rather than from contrasts with the experiences of other countries. It supplements Dréze and Sen's India: Economic Development and Social Opportunity, which studies what we can learn from international comparisons of policies, actions, and achievements.

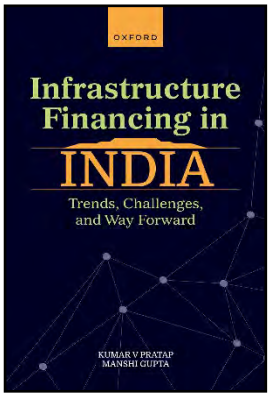

Jean Drèze, development economist, has taught at the London School of Economics and the Delhi School of Economics.

Amartya Sen teaches economics and philosophy at Harvard University and was previously Master of Trinity College, Cambridge.

9780198865674 | Paperback | 2020 | ₹695

Infrastructure Financing in India

Trends, Challenges, and Way Forward

Governments the world over want to spend more on infrastructure (the benchmark for developing countries is 7 – 8% of GDP per annum) to lay the foundation for sustained and inclusive growth. India is no exception. It realizes that more needs to be spent on infrastructure for the country to regain its position as the fastest growing large economy in the world. While India spent about 7.2% of its GDP on infrastructure during the Eleventh Plan period (2008-12), this number has recently come down to approximately 5%.

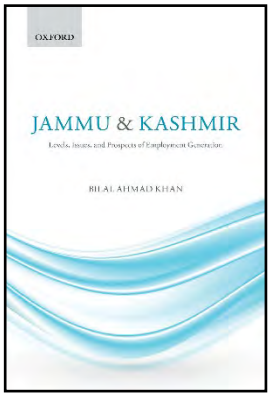

Kumar V Pratap is a Senior Economic Adviser in the Government of India and has earlier worked with the Prime Minister's Office and Ministry of Finance as Joint Secretary.

Manshi Gupta is Deputy Director, Infrastructure Policy and Planning Division, Ministry of Finance, Government of India.

9780198884934 | Hardback | 2023 | TBA

Jammu & Kashmir

Levels, Issues, and Prospects of Employment Generation

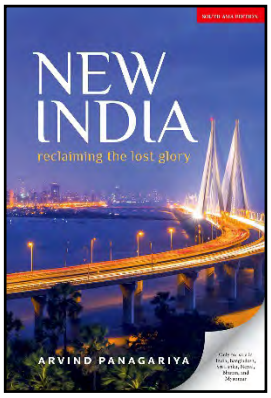

The book presents a comprehensive treatment of unemployment and economic problems in Jammu & Kashmir. Kashmir, being a conflict-ridden zone, has far less opportunities for employment than rest of the other states. With an underdeveloped industrial sector and the inability of government to create enough jobs, there seems to be no immediate solution. Lack of avenues to engage the youth in meaningful ways result in making miscreants out of many of them.

Dr Bilal Ahmad Khan completed his doctorate in 2018 at Jawaharlal Nehru University, New Delhi.

9780192849656 | Hardback | 2022 | ₹1295

New India

Reclaiming the Lost Glory

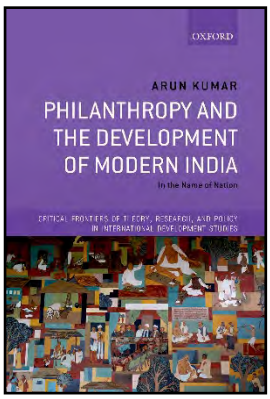

In New India: Reclaiming the Lost Glory, Arvind Panagariya outlines a concise strategy to transform India from a primarily rural and agricultural economy to an urban and industrial economy with well-paid jobs for those with limited skills. Panagariya argues that the creation of good jobs requires the emergence of medium and large enterprises in industry and services, especially labor-intensive sectors such as apparel, footwear, and other light manufactures.

Arvind Panagariya is Professor of Economics and the Jagdish Bhagwati Professor of Indian Political Economy at Columbia University.

9780197620090 | Hardback | 2021 | ₹695

Philanthropy and the Development of Modern India

In the Name of Nation

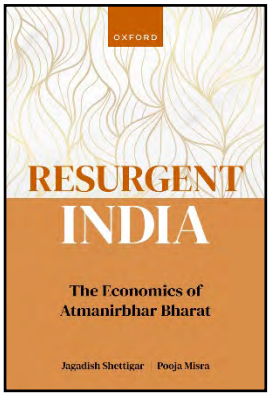

Philanthropy and the Development of Modern India plots the careers of the national-modern in four main sites of development: civil society, community, science and technology, and selfhood. In an unusual move reading socio-economic nationalist reform from the first half of the twentieth century alongside post-colonial development from the second half, Kumar uncovers the lineages of contemporary development ideas such as self-care, self-reliance, and merit.

Arun Kumar is a Lecturer at the University of York, UK.

Rise of the North East

The Path to Prosperity, Inclusion, and Sustainability

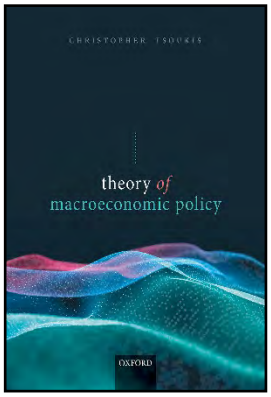

This book gives a detailed assessment of the scope for strengthening economic capacities across sectors, ensuring economic prosperity through connectivity, and discusses the resource gaps. It comprehensively captures the wide range of economic possibilities existing in the north eastern region of India in terms of sectors, local resources, and expertise. Further, the book identifies gaps in supply chains and host of other factors around limited economic capacities and continued connectivity deficiencies that hold the region back.

Research and Information System for Developing Countries (RIS) is a New Delhi-based autonomous policy research institute that specializes in issues related to international economic development, trade, investment, and technology.

Theory of Macroeconomic Policy

Theory of Macroeconomic Policy reviews the theoretical foundations of macroeconomic, fiscal, and monetary policy. It offers a panoramic view of macroeconomic theory, covering a wide range of topics that are not customarily dealt with in macroeconomics texts, as well as more standard material. Advanced theory is bridged with more elementary or intermediate material, and established models are reviewed alongside current research directions. There is an extensive review of empirical evidence on virtually every topic, supplemented by narrative accounts for various episodes.

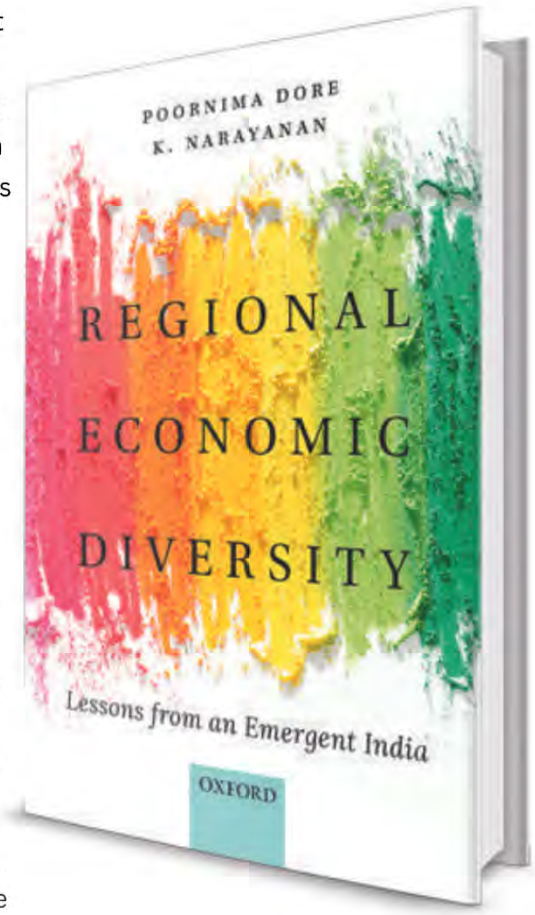

Christopher Tsoukis is a macroeconomist with the Economics and Finance Group of the Keele University Business School.

Regional Economic Diversity

Lessons from an Emergent India

What is more conducive to economic development of a nation-specialisation or diversification? Are regions within a developing economy experiencing divergence or convergence as they embark on high growth path? The learnings from the India story has valuable lessons on such aspects for other developing countries and so this book is a deep dive into the regional economy of India. A region's ability to experience growth is to a large extent determined by its ability to attract either industry or people. This phenomenon is known as agglomeration and affects concentration of firms, development of industrial hubs, policies towards special economic zones, flows of labour and capital, and formation and growth of cities. Given the size and diversity within each state in India, there is an urgent case for going one step below to identify homogeneous units at a sub state level, viz., NSS regions, something which this book seeks to address.

State Capability in India

The deficiencies in the capability of the state to design and implement effective policies are arguably the biggest development challenge facing developing countries like India. This book seeks to assess state capability in India, identify weaknesses in policy design and programme implementation, and their causes, and propose some measures to remedy them. Importantly, it does so while recognizing political economy constraints and focusing predominantly on the administrative contributors. To this extent, the book's suggestions are practical enough for adoption by stakeholders at different levels. It describes the institutional design, constitutional provisions, the organizational structure, and the personnel of the Indian state. It covers a wide spectrum of aspects impacting state capability, ranging from ideological narratives and systemic constraints to procedural and personnel management issues to the behaviours and attitudes of individual bureaucrats. It offers a new analytical framework to think about effectiveness of state on the policy-making process. It also offers a nuanced perspective and suggestions on many of the popular themes in public administration - size of the state, generalist and specialist debates, lateral entry, digital monitoring systems in governance, outsourcing and private participation, use of consultants, risk aversion in bureaucracies, performance-based incentives, programme evaluations, and so on.

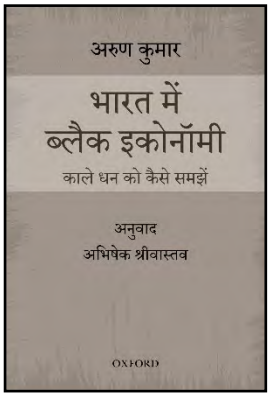

T.V. Somanathan holds a Ph.D in Economics (Calcutta). He is a Chartered Accountant (England & Wales), Fellow of the Chartered Governance Institute (London), FCMA (London), FCCA (London), ACS, and ACMA (India). He is also a part of the Executive Development Program at Harvard.

भारत में ब्लैक इकोनॉमी

काले धन को कैसे समझें

प्रधानमंत्री नरेंद्र मोदी द्वारा नोटबंदी करने की एक ज़रूरी वजह काले धन का खात्मा बताया गया। काला धन एक मायावी खेल की तरह राजनीति में काम करता रहा जैसा कि यह अपनी प्रकृति में भी मायावी है। यह पुस्तक सरल भाषा में हमें काले धन के बारे में बताती है कि काला धन क्या है? यह किसी देश की अर्थव्यवस्था में किस तरह काम करता है? भारत में ब्लैक इकोनॉमी की स्थिति क्या है और यह कैसे काम करती है? इन सारे सवालों को विस्तार और सरल ढंग से यह पुस्तक हमें बताती है। परोक्ष तौर पर भ्रष्टाचार का चलन और काले धन के बीच किस तरह का संबंध है यह किताब इसे भी समझने की दृष्टि देती है।

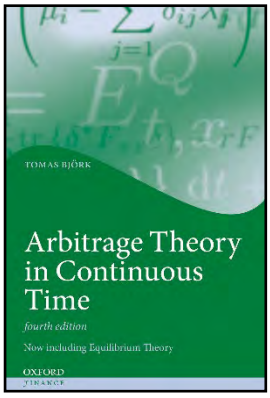

अरुण कुमार भारत के प्रसिद्ध अर्थशास्त्री और जवाहरलाल नेहरू विश्वविद्यालय में अर्थशास्त्र के प्रोफ़ेसर रहे हैं।

ECONOMICS

Arbitrage Theory in Continuous Time

In the substantially extended fourth edition Tomas Björk has added completely new chapters on incomplete markets, treating such topics as the Esscher transform, the minimal martingale measure, f-divergences, optimal investment theory for incomplete markets, and good deal bounds. This edition includes an entirely new section presenting dynamic equilibrium theory, covering unit net supply endowments models and the Cox-Ingersoll-Ross equilibrium factor model.

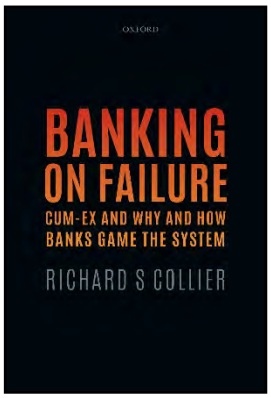

Tomas Björk is Professor Emeritus of Mathematical Finance at the Stockholm School of Economics.

Banking on Failure

Cum-Ex and Why and How Banks Game the System

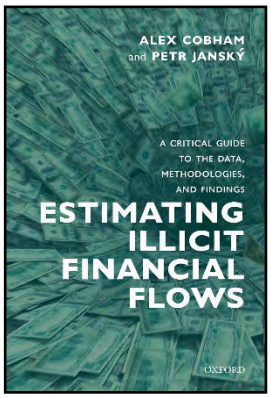

Banking on Failure: Cum-Ex and Why and How Banks Game the System explains why banks design and use structured products to exploit tax systems. It describes one of the biggest and most complex cases — the "cum-ex" scandal — in which hundreds of banks and funds from across the globe participated in the raid on the public exchequers of a number of countries, with losses in the tens of billions of euros.

Richard Collier is currently a Senior Tax Advisor at the OECD.

Estimating Illicit Financial Flows

A Critical Guide to the Data, Methodologies, and Findings

Estimating Illicit Financial Flows: A Critical Guide to the Data, Methodologies, and Findings is authored by two of the economists most closely involved in the process to develop UN indicators of illicit financial flows. In it, they offer a critical survey of the existing data and methodologies, identifying the most promising avenues for future improvement and setting out their own proposals. They cover a range of corrupt practices aimed at obtaining immunity or impunity from criminal law, from market regulation, and from taxation.

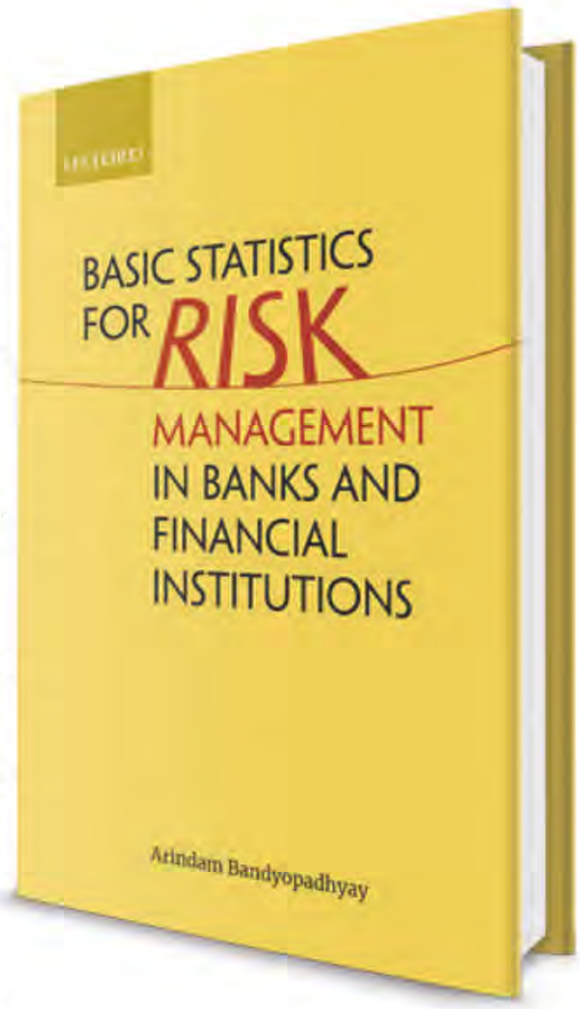

Alex Cobham is an economist and Chief Executive of the Tax Justice Network.

Petr Janský is Associate Professor in Economics, at Charles University, Prague.

Basic Statistics for Risk Management in Banks and Financial Institutions

The book provides an engaging account of theoretical, empirical, and practical aspects of various statistical methods in measuring risks of financial institutions, especially banks. In this book, the author demonstrates how banks can apply many simple but effective statistical techniques to analyze risks they face in business and safeguard themselves from potential vulnerability. It covers three primary areas of banking; risks-credit, market, and operational risk and in a uniquely intuitive, step-by-step manner the author provides hands-on details on the primary statistical tools that can be applied for financial risk measurement and management. The book lucidly introduces concepts of various well-known statistical methods such as correlations, regression, matrix approach, probability and distribution theorem, hypothesis testing, value at risk, and Monte Carlo simulation techniques and provides a hands-on estimation and interpretation of these tests in measuring risks of the financial institutions. The book strikes a fine balance between concepts and mathematics to tell a rich story of thoughtful use of statistical methods.

Food Insecurity in India's Agricultural Heartland

The Economics of Hunger in Punjab

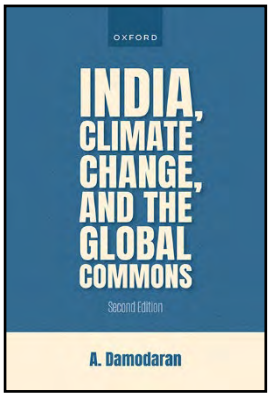

India is home to the world's largest hungry population and has a long way to go before it is anywhere near the mammoth task of achieving the United Nations' goal of ending hunger in 2030. It is ironic that this book raises the issue of "hunger" in a state where it is least expected. Punjab is a state with mountains of food grains and overflowing godowns, with highest yields, and largest area under irrigation.

Dr. Harpreet Kaur Narang has been teaching at SGTB Khalsa College, University of Delhi, for more than two decades and specialises in macroeconomic policy and development related issues.

The Economic History of India, 1857-2010

Fourth Edition

Does a study of the past help to explain the paradox of growth amidst poverty? The Economic History of India: 1857-2010 claims that the roots of this paradox go back to India's colonial past, when internal factors like geography and external forces like globalization and imperial rule created prosperity in some areas and poverty in others.

Looking at the recent scholarship in this area, this revised edition covers new subjects like environment and princely states. The author sets out the key questions that a study of long-run economic change in India should begin with and shows how historians have answered these questions and where the gaps remain.

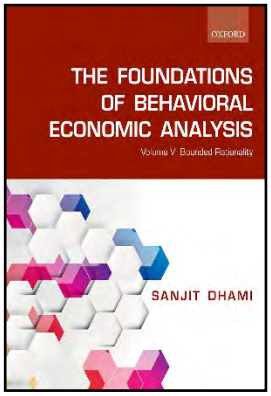

Tirthankar Roy is Professor of Economic History, London School of Economics and Political Science, London, United Kingdom.

INTERNATIONAL ECONOMICS

China

The Bubble that Never Pops

The Chinese economy appears destined for failure, the financial bubble forever in peril of popping, the real estate sector doomed to collapse, the factories fated for bankruptcy. A banking system more than twice the size of the U.S. and an economy still a third smaller. A looming trade war with the United States that threatens to lock its factories out of the world's biggest market. An urban landscape littered with ghost towns of empty property. An industrial sector strewn with state-owned zombie firms. A two-hundred million strong migrant workforce treated as second-class citizens in the cities where they live and work.

Tom Orlik spent eleven years in China as Chief Asia Economist for Bloomberg and as a journalist for the Wall Street Journal.

Free Trade Agreements

India and the World

A Free Trade Agreement (FTA) is an agreement between two or more countries where the countries agree on certain terms and conditions that affect trade between them. There are more than 350 FTAs worldwide today. In the last two decades, these agreements significantly expanded in scope, covering not only market access but also behind-the-border policy issues going far beyond WTO rules. Mega regional FTAs like Comprehensive and Progressive Agreement for Trans-Pacific Partnership (CPTPP) and Regional Comprehensive Economic Partnership (RCEP) are coming into play. Developed countries are also establishing their own templates for FTA-making. This book is intended to bring about a greater level of understanding among readers in a systematic manner with respect to the vast changes taking place on the FTA scene worldwide and about India's own limited participation in this regard so far. FTAs are legal instruments, but they also substantially affect business, industry, and agriculture interests. There is a widely held perception in the country, not without some validity, that India's existing FTAs, even if limited, have benefitted the partner countries more than us. India has recently signed two FTAs — with the UAE and Australia. Discussions with the UK are at an advance stage and both the countries are expected to sign the FTA soon. This book tries to capture various aspects of these agreements keeping India's position in mind.

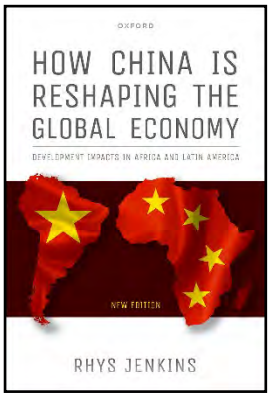

V. S. Seshadri joined the Indian Foreign Service in 1978. Apart from diplomatic and ambassadorial assignments abroad, he served as the Joint Secretary for WTO matters in India's Ministry of Commerce from 1999 to 2003, when he undertook trade negotiations.

How China is Reshaping the Global Economy

Development Impacts in Africa and Latin America, Second Edition

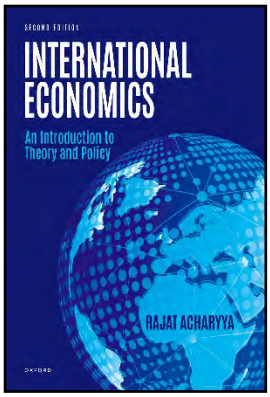

How China is Reshaping the Global Economy: Development Impacts in Africa and Latin America throws more light on these controversies through a comparative study of China's impact on the two regions. It looks not just at bilateral relations between China and the two regions but also analyses the changes in the global economy brought about as a result of the shift in economic activity from North America and Western Europe to Asia.

Rhys Jenkins is Professor of Development Economics at the School of International Development, University of East Anglia.

9780192866356 | Paperback | 2023 | ₹1495

International Economics

An Introduction to Theory and Policy

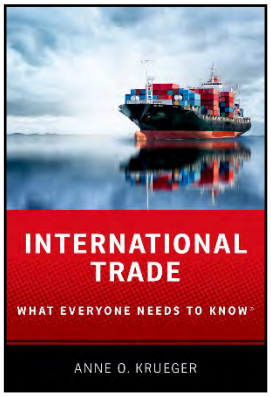

Complementing trade theories with relevant trade empirics, this book covers three aspects of the study of International Economics: pure theory of trade, trade policy, and theory of Balance of Payments (BoP) and exchange rate. In the first part, it discusses the basic principles of international trade between dissimilar countries as well as between similar countries, and implications thereof in terms of welfare, income distribution, and growth. The approach taken here is distinctly different from that in most of the existing textbooks on international economics.

Rajat Acharyya is currently Professor of Economics at Jadavpur University and former Dean, Faculty of Arts, Jadavpur University.

9780192865144 | Paperback | 2022 | ₹1095

International Trade

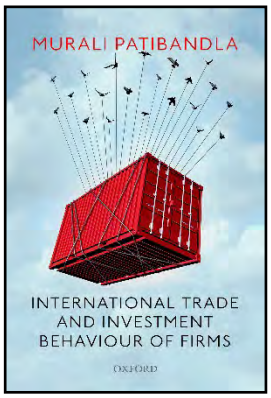

International Trade: What Everyone Needs to Know® lays the foundation to understand what trade does and does not do. Focusing on the importance of trade in both goods and services, Krueger explores the effects of various trade policies step-by-step and demonstrates why economists generally support free trade. Krueger considers the historical experience, highlighting how technological changes and reduction of trade barriers helped transform the world economy.

Anne O. Krueger is a former World Bank chief economist and former first deputy managing director of the International Monetary Fund.

International Trade and Investment Behaviour of Firms

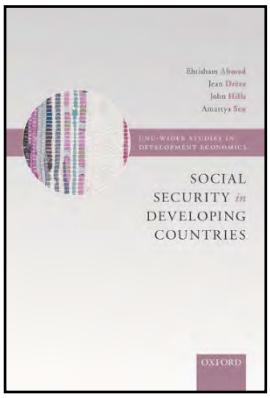

Focusing on Indian firms, the book spans the period from the pre-reform era to the post-reform era, when the market was responding to policy reforms and global market dynamics. The reforms, it argues, resulted in positive outcomes of increased outward orientation and annual growth rates. The book also comments on the economic and institutional factors that change over time, locally as well as globally, and affect the behaviour of firms and industries.

Murali Patibandla is former Professor, Indian Institute of Management, Bangalore, India.

POLITICAL ECONOMY

Why Nations Rise

Narratives and the Path to Great Power

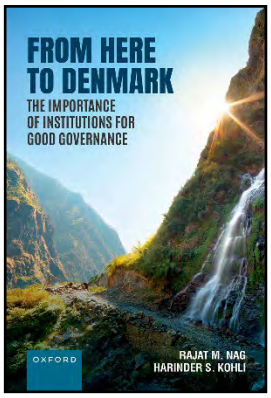

In Why Nations Rise, Manjari Chatterjee Miller answers these questions and shows that some countries rise not just because they develop the military and economic power to do so but because they develop particular narratives about how to become a great power in the style of the great power du jour. These active rising powers accept the prevalent norms of the international order in order to become great powers.

Manjari Chatterjee Miller is Associate Professor of International Relations at the Frederick S. Pardee School of Global Studies at Boston University.

From Here to Denmark

The Importance of Institutions for Good Governance

"Here" is a hypothetical place where governance is poor, rule of law is not respected, and justice is often denied. Many, particularly the poor and the marginalised, suffer daily indignities, big and small, and live a life marked by fear and insecurity.

"Denmark", on the other hand, is where good governance prevails and is reflected in predictable and accountable actions by others, including the State.

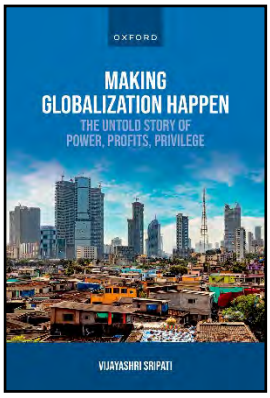

Rajat M. Nag is concurrently a Distinguished Fellow at the Emerging Markets Forum, Washington, D.C., and a Non-Resident Senior Fellow at the National Council of Applied Economic Research, Delhi.

Harinder S. Kohli is the Founding Director and Chief Executive of the Emerging Markets Forum, Washington, D.C.

Making Globalization Happen

The Untold Story of Power, Profits, Privilege

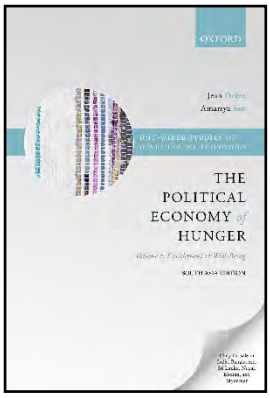

Making Globalization Happen: The Untold Story of Power, Profits, Privilege rips away the facade of UN family-driven peace, justice, human rights, democracy, and development to expose it as a narrative of power, profit, and privilege for transnational capitalists and debt, death, and despair for the Global South.

Vijayashri Sripati has served as a visiting scholar at the Trafficking and Social Justice Institute in the College of Health and Human Services at the University of Toledo, Ohio (2019–2023).

9780198903154 | Hardback | 2023 | TBA

The Political Economy of Hunger

Volume 1: Entitlement and Well-being

This volume is the first of three addressing a wide range of policy issues relating to the role of public action in combating hunger and deprivation in the modern world. It deals with the background nutritional, economic, social, and political aspects of the problem of world hunger.

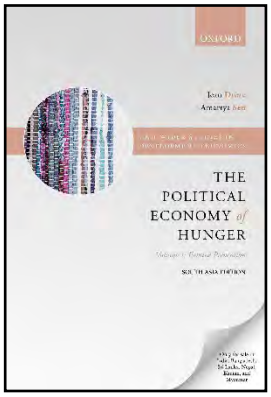

Jean Drèze, development economist, has taught at the London School of Economics and the Delhi School of Economics.

Amartya Sen teaches economics and philosophy at Harvard University and was previously Master of Trinity College, Cambridge.

9780198865483 | Paperback | 2020 | ₹695

The Political Economy of Hunger

Volume 2: Famine Prevention

Volume 2 deals with famine prevention, paying particular attention to sub-Saharan Africa. The topics covered include: the problems of early warning and early action; the politics of famine prevention; the influence of market responses; the role of cash support and employment provision in protecting threatened food entitlements; and long-term issues of reduction of famine vulnerability.

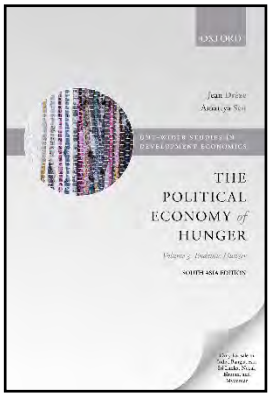

Jean Drèze, development economist, has taught at the London School of Economics and the Delhi School of Economics.

Amartya Sen teaches economics and philosophy at Harvard University and was previously Master of Trinity College, Cambridge.

9780198865766 | Paperback | 2020 | ₹695

The Political Economy of Hunger

Volume 3: Endemic Hunger

Volume 3 deals with the strategic options for the elimination of endemic hunger. The topics covered include: the comparative extent of hunger and deprivation in different parts of the world; the influence of food production; the interconnections between economic growth and public support; the role of economic diversification in reducing vulnerability; the potential impact of direct public provisioning on living standards; and the politics of public action.

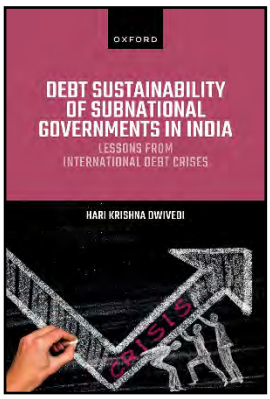

Jean Drèze, development economist, has taught at the London School of Economics and the Delhi School of Economics.

Amartya Sen teaches economics and philosophy at Harvard University and was previously Master of Trinity College, Cambridge.

Debt Sustainability of Subnational Governments in India

Lessons from International Debt Crises

In Debt Sustainability of Subnational Governments in India: Lessons from International Debt Crises, Dwivedi analyses the debt sustainability of the Indian states in the context of many emerging issues and challenges to their fiscal health with the aim of providing usable and practical policy recommendations.

Dr. Hari Krishna Dwivedi is a distinguished Indian civil servant and the current Chief Secretary of the Government of West Bengal.

9780198903116 | Hardback | 2023 | TBA

Public Expenditure in India

Policies and Development Outcomes

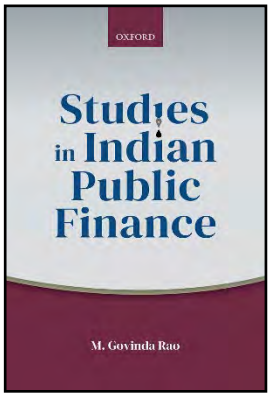

The book provides an empirical understanding of historical trends and composition of public expenditure at the central and the subnational levels; the effectiveness of public expenditure control systems and accountability issues; the political economy of spending decisions; public expenditure reforms undertaken in India; and international best options that can guide the corrective process in India. Given the global shift in focus from 'outlays' to 'outcomes', it is important to put in place a sound framework to track the results of government expenditure programs to guide the informed expenditure decision-making process.

Gayithri Karnam is former Professor of Economics at the Institute for Social and Economic Change, Bangalore.

9780192857569 | Hardback | 2022 | ₹1495

Studies in Indian Public Finance

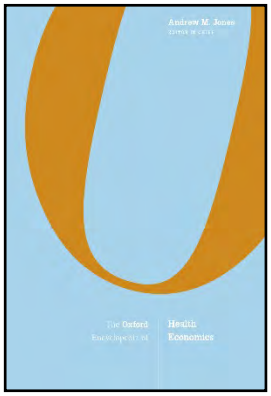

Studies in Indian Public Finance is a comprehensive analytical study of Indian public finance evaluated in the background of theories and best practice approaches. It is a comprehensive analysis of the nature and composition of public spending and its financing. Beginning with normative questions on the role of the State, the book argues that public expenditure policies in India are dominated by political economy considerations.

M. Govinda Rao is currently working as Councillor, Takshashila Institution, Bangalore.
